

TOPICS FOR THE YEAR

Every year we look for topics which would impact the giants in their way of thinking, and topics which would be able to assist them in gaining skills. Our topics for each year are available in the year plan.

HELP NEEDED

We appreciate any form of contribution in assisting us in carrying out with this vision. Our Monthly meetings requires us to provide lunch for the giants. When we have outside activities we need to provide the giants with transport, food and funds for the activities. As our giants grow we have had requirements to assist them with funds to register at the university. We have seen giants pull out of tertiary institutions due to lack of funds. We have also had instances where we were required to provide for temporary accommodation for a giant.

Our account details are: Standard bank, RaisingGiants Organisation, 280465173, Northgate branch

RAISING GIANTS ORGANIZATION

Each and every child, is born with unlimited dose of potential, unfortunately some are born in th conditions that only say to them “CANT”... or “YOU WILL NEVER...” Ra Giants Organization, exist for th specific kids, letting them know tl “YOU CAN”, and “YOU WILL”.

RAISING GIANTS ORGANISATION

OUR VISION

A BETTER 'KASI'...

A BETTER SOUTHAFRICA ...

A BETTER WORLD...

If one child from a poverty stricken household can dream and believe that they are destined to be better than their circumstances, then we can produce a world with better individuals who just aspire to become better and make this a better world. This will eventually change the world.

OUR MISSION

- To spend time with each child and map their lives
- To teach each child different skills which can assist them in realizing their dreams
- To plant a seed of aspiration within a child
- To inspire each child by leading by example

REASON FOR EXISTENCE

The difference between the rich and the poor is not the material possessions the rich have, it is not even the money in the bank accounts or the bank account on its own, BUT it is sheer knowledge. Being raised in a poverty stricken environment limits one's access to that knowledge that one needs to escape such an environment. Raising Giants aims to bring such knowledge and skills to young people living in poor communities, so that they can be equipped with knowledge and be prepared to compete for the same price other privileged kids are competing for

OUR GIANTS

We are currently working with kids between the age of 10—23, from Cosmo City schools. We started in 2008 with 30 kids, and we currently have 70 kids in our database.

HOW THE PROGRAM WORKS

The program has 9 mentors who have volunteered to serve the kids. We meet once a month where we discuss a certain topic. The mentors then select kids they can work with for the month on that particular topic. This allows us to spend more time with the kids. Mentors also look for opportunities to collaborate exposures and experience giants would not have natural access to.

NEEDS IDENTIFIED

As giants open up we learn that we require a need psychologist

Consistent supply for food, as money raised is spent on monthly food

RGO requires a consistent sustainable income to assist in tertiary

OUR AIM

- To continue with our monthly meetings a build confidence while teaching softer skills
- To raise enough funds to have extramural activities for the high school group, particularly in Public Speaking and computer lessons

SUPPORT TO COMPANIES

To encourage other companies to do their part contributing to communities, by managing responsibilities of other companies. This does not necessarily mean for Raising giants. We noticed that companies have resources to donate, however they do not have anyone to do the running around. RGO is availing itself to such a need.
